

Biden Must Enjoy Having His Foot in His Mouth

It's an everyday event with Joey opening his mouth and out comes...??? Well yesterday, June 25, 2021, Joey was trying to make a point on why some people were not getting vaccinated. This is probably when his handlers should have jumped in, put a bag over his head and used a stage hook to pull him away from the podium. So Joey explained that the reason that African-Americans were not getting vaccinated was because they had a fear of being experimented on, just like what happened to the Tuskegee Airmen. SAY WHAT ???

Simply put: the famous World War II Tuskegee Airmen had NOTHING to do with the Tuskegee Syphilis Experiment of the 1930's. What is wrong with Joey? The Tuskegee Airmen was an all Black squadron of fighter pilots of WWII that were incredible in their mission to fight the Nazi's, where the Tuskegee syphilis experiment consisted of withholding treatment of African-American men to study them. The experiment was not discovered until 1972, in which payments were made to those affected.

In the same speech, Joey then went on to talk about Hispanics calling them LatinX. This is an attempt by the "woke" crowd to remove the "o" or "a" at the end of Latino or Latina to make it gender neutral. Only about 3 percent refer to themselves in this manner. "Come on man..."

Normally, you can tell when Joey is lying because his mouth is moving and words are coming out of his mouth. In this case, his dementia is showing and it is just downright disgraceful and embarrassing to every American. Another example of Joey's inability to lead and/or represent America.
