

## Kamal-Lady Still Absent from the Border

It took 93 days for Kamal-Lady to go close to the border. On Friday, June 25, 2021, she went to El Paso, Texas, however that location has far fewer illegal migrants crossing into the U.S. than the Del Rio sector. Although she spent nearly six hours in El Paso, it was primarily at the El Paso International Airport and nowhere near the border.

Fox News reporter Peter Doocy asked Kamal-Lady about the appropriateness in the timing of her visit. Again, Kamal-Lady said that she had previously been to the border, when in fact she has not as Vice-President. Kamal-Lady is someone that tries to use wording that makes it sound one way and is actually something else. Some might call that lying, others might call that lying.

It was interesting from the clips shown on the news, her cackling seemed to be in control. There is an unconfirmed report that the Cartels had given all illegal migrants earplugs just in case she actually went to the border and cackled. The Cartels were concerned that their travel clients would flee back into Mexico if Kamal-Lady cackled.

So in the interest of accurate information, Kamal-Lady may have gone to the border, but it was possibly "The Border – Bar & Grill" in California where her next stop was after El Paso.
