

A Real Collusion in the Making? Biden's Timeline

For years the mainstream media tried to link former President Trump to Russian collusion by using false information, and came up with zip, zero, nada. In almost a blink of an eye, current President Sleepy Joe has positioned himself as the man of the year in how to “Make Russia Great Again”.

Just hours after Joe was sworn into office, Joe signed an executive order canceling the 1,200 mile Keystone XL Pipeline that would have brought Canadian oil to the Gulf Coast refineries. That move cost approximately 11,000 American jobs.

Two days after being sworn in, Joe suspends any new oil and gas drilling permits on federal lands.

On May 10, 2021, a Russian criminal group called *Darkside* claimed responsibility for a ransomware attack that shut down a major U.S. fuel pipeline operated by Colonial Pipeline Company. To date, Joe's administration has done nothing to make Russia locate and hold the actual criminals responsible.

On May 20, 2021, Joe signs off on the waiver that was blocking the construction of the Russian pipeline, Nord Stream 2, from Ust-Luga, Russia to Greifswald, Germany under the Baltic Sea next to Nord Stream 1. According to the BBC, Joe wanted a stable relationship with Russia even though Joe had previously said that he opposed the completion of Nord Stream 2.

On Aug. 12, 2021, a video of Hunter Biden in a hotel room with a prostitute was made public. He explains, to the unnamed prostitute, that he suspects Russians were responsible for stealing a laptop that contained sensitive information for the purpose of blackmailing him while he was passed out from partying.

Let's not forget that according to the New York Post, “Hunter Biden received a \$3.5 million wire transfer from Elena Baturina, the richest woman in Russia and the widow of Yury Luzhkov, the former mayor of Moscow, Senate Republicans revealed in their report on the younger Biden’s work in Ukraine.” Additionally, “The probe also found that Baturina sent 11 wires transfers between May and December 2015 to a bank account belonging to BAK USA, a tech startup that filed for bankruptcy in March 2019. Nine of those 11 wire transfers were first sent to Rosemont Seneca Partners, the investment firm founded by Biden and Chris Heinz, stepson of former Secretary of State John Kerry, before being transferred to BAK USA.”

ARE YOU GETTING THE PICTURE YET? WHAT DOES RUSSIA KNOW?
