

## Sleepy Joe's Tax Scam

*(but it doesn't cost one cent)*

Since 2012, the idea of a minimum wage of \$15 was started, in all places, was Seattle, Washington. With the Biden Administration, the \$15 minimum wage seemed like a good way to convince America that it was a good idea. But wait!

No matter what he touches, Biden has failed. Time and time again. Going back to the \$15 minimum wage, by itself would sort of make sense IF inflation was controlled. The increase puts a burden on small businesses and thus layoffs are inevitable. So now inflation is the worst in 30 years. What ever you want, it now costs more, thus if inflation is at a rate higher than an increase in pay, you are losing money. Food, clothing, gas, cars, homes, gifts, etc. What makes it even worse, is that any tax is based upon the price of whatever you are buying. If it costs more, you pay more tax. Thus the insane \$3.5 – \$5.5 trillion Democrat Socialist spending spree will also contribute to the already out of control inflation. Inflation affects everyone, whether you make under \$400,000 or more.

Biden keeps gaslighting everyone that the spending is needed and it won't cost the American taxpayer earning under \$400,000 one single cent more in taxes. As an observation, you can tell when Biden is lying because his lips are moving. But it is so obvious that taking into account the spending bill itself will cause even more uncontrolled inflation, thus raising the cost of living on just about everything that is needed to live, which in turn raises the amount of tax that the purchaser must pay due to the increase in price of the product.

Since the overall goal of the Democrat Socialists, and even in Biden's own words of wanting to change the U.S. economy, it would appear that this has been in the planning for some time. How to raise \$95 trillion for the Green New Deal right under everyone's noses, but keep lying to everyone to make them think that everything is just fine. **It's not okay!**
